About Oasis Center

Oasis Center will connect with more than 3,500 youth this year to empower them to overcome barriers that keep them from experiencing success. Helping youth and families in crisis, connecting teens to opportunities to engage and lead in our community, and ensuring low income and first generation students have access to college or training are our main areas of focus. All services at Oasis Center are provided free of charge to our community where we have served since 1969.
